

# P802.1Qcc Stream Reservation Protocol (SRP) Enhancements and Performance Improvements

Resolution of Comments on  
Project Authorization Request (PAR) extension

2017-07-12

# From 802.3

## › Comment:

General — No comments on the extension. Observation to staff. (The WG may choose to drive follow-up through their staff liaison.) Perhaps the myProject tools are not working as advertised. The NesCom FAQ indicates a PAR modification is not required to update WG and Sponsor contact information. This PAR extension (assuming it is pdf output from myProject) does not list the current 802.1 WG Chair, which per the NesCom FAQ, should have been updated when Mr. Parsons accepted his role as 802.1 Chair.

## › Response:

We will try to ensure that the WG chair is listed correctly on the PAR form.
