Roger B. Marks Chair, IEEE 802.16 Working Group r.b.marks@ieee.org 5 April 2009

To: RevCom

Re: P802.16j Submittal

I have submitted an application for the approval of draft P802.16j/D9 under the P802.16j amendment PAR. The review is on the agenda for the RevCom meeting of 1 May 2009.

Draft P802.16j/D9 was reviewed in the fourth P802.16j ballot recirculation, from 20 March – 4 April. No new Disapprove votes were received. One comment was received: an Editorial Coordination comment as follows: "Meets all editorial requirements." The final vote count, as reported by myBallot, was 161 Approve and 2 Disapprove.

I would also like to bring to your attention the matter of the relationship of this document to the P802.16Rev2/D9a draft, which is itself the basis of a submittal (under the P802.16 revision PAR) to the 1 May RevCom meeting. The P802.16j draft is being submitted as an amendment to the IEEE Std 802.16 as it will exist following the approval of P802.16Rev2/D9a. In conjunction with this issue, I would like to note the following points:

- P802.16Rev2/D9a, per the P802.16 revision PAR, is based on a consolidation of IEEE Std 802.16-2004 along with the amendments 802.16e, 802.16f, and 802.16g. Per the IEEE-SA Standards Board Operations Manual, Subclause 8.1.2, "Up to three amendments can be approved before the standard shall be revised, unless the base standard has been approved or reaffirmed within the past three years." Consequently, P802.16j has been developed as an amendment to the new P802.16 revision.
- During each Sponsor Ballot recirculation, the voters have been notified of the situation and provided the most current P802.16Rev2 draft. For example, in the second recirculation, the cover letter stated the following: "As an additional reference, we are providing the draft P802.16Rev2/D8. This document, not an approved IEEE standard but currently in separate Sponsor Ballot, is intended as the baseline for 802.16j to amend."
- During the last Sponsor Ballot recirculation, the voters were provided with P802.16Rev2/D9a (which has since been submitted to RevCom). The P802.16j Ballot Group was explicitly notified, both in the cover letter and in the ballot announcement, of the 802.16 Working Group's expectation that P802.16Rev2/D9a would be the final draft of P802.16Rev2. In particular, the cover letter and the ballot announcement stated the following:

As noted during the previous recirculation, a revision of the base 802.16 standard is progressing in parallel with this amendment project. P802.16j/D9 is based on and will amend this new revision. In the current recirculation, the base document for the revision has been updated from P802.16Rev2/D9 to P802.16Rev2/D9a. This new draft D9a differs from the previous draft D9 only in subclause 1.2 ("Purpose") on Page 1. The change was made as a result of RevCom decisions on 18 March 2009.

2009-05-04 IEEE 802.16-09/0010r3

Other than subclause 1.2, P802.16Rev2/D9 and P802.16Rev2/D9a are identical. Although P802.16Rev2/D9a is not yet approved, it is currently in what the 802.16 Working Group expects will be its final Sponsor Ballot recirculation. Provided that the P802.16Rev2/D9a recirculation concludes successfully, we expect that P802.16Rev2/D9a will be considered for approval by RevCom and could be approved by the IEEE-SA Standards Board as the latest revision of IEEE Std 802.16.

• We are aware that the IEEE-SA Standards Board Operations Manual, Subclause 8.1.2, states that "Sponsor ballots of amendments and corrigenda shall also include access to the approved base standard and any approved amendments and corrigenda in order to provide sufficient information to the ballot group." We are confident that we have met the spirit of this requirement. Furthermore, if our P802.16Rev2/D9a submittal application is approved by the IEEE-SA Standards Board, then we will be able to state affirmatively (although retroactively) that the ballot group was afforded access to the approved base standard, so that we will have met the letter as well as the spirit of the rules.

We therefore request RevCom's 1 May recommendation that P802.16j/D9 be approved by the IEEE-SA Standards Board. Under the circumstances, it would be appropriate for P802.16j/D9 approval be specifically contingent on the approval of P802.16Rev2/D9a.

Sincerely,

Roger Marks Chair, IEEE 802.16 Working Group on Broadband Wireless Access
