

Title: LE Task Group Report - Meeting 41

Document Number: IEEE 802.16h-06/002

Date Submitted: Jan. 12, 2006

Source:

Chair of LE TG: Mariana Goldhamer
ALVARION

Voice: +972 3 645 6241

mariana.goldhamer@alvarion.com

21a HaBarzel Street, Tel Aviv, Israel

Venue:

Meeting 41, Jan. 12, 2006

Base Document:

Purpose:

Notice:

This document has been prepared to assist IEEE 802.16. It is offered as a basis for discussion and is not binding on the contributing individual(s) or organization(s). The material in this document is subject to change in form and content after further study. The contributor(s) reserve(s) the right to add, amend or withdraw material contained herein.

Release:

The contributor grants a free, irrevocable license to the IEEE to incorporate material contained in this contribution, and any modifications thereof, in the creation of an IEEE Standards publication; to copyright in the IEEE's name any IEEE Standards publication even though it may include portions of this contribution; and at the IEEE's sole discretion to permit others to reproduce in whole or in part the resulting IEEE Standards publication. The contributor also acknowledges and accepts that this contribution may be made public by IEEE 802.16.

IEEE 802.16 Patent Policy:

The contributor is familiar with the IEEE 802.16 Patent Policy and Procedures <<http://ieee802.org/16/ipr/patents/policy.html>>, including the statement "IEEE standards may include the known use of patent(s), including patent applications, provided the IEEE receives assurance from the patent holder or applicant with respect to patents essential for compliance with both mandatory and optional portions of the standard." Early disclosure to the Working Group of patent information that might be relevant to the standard is essential to reduce the possibility for delays in the development process and increase the likelihood that the draft publication will be approved for publication. Please notify the Chair <<mailto:chair@wirelessman.org>> as early as possible, in written or electronic form, if patented technology (or technology under patent application) might be incorporated into a draft standard being developed within the IEEE 802.16 Working Group. The Chair will disclose this notification via the IEEE 802.16 web site <<http://ieee802.org/16/ipr/patents/notices>>.

IEEE 802.16 LE TG activity

- 9 contributions
- Agreement was reached on controversial issues
- Decisions taken for:
 - Updating the working document, based on accepted text
 - Clarifications requested from contributors
 - Start using the Commentary
- Double time is needed for the next meeting

Topics to be clarified

- Solution for entering a community over the air
- Definition of the process for Adaptive Channel Selection
- Communication using the Coexistence Time Slot
- Possibility of BS-BS communication over the air
- Default value for the “same MAC Frame duration”
- Coexistence with preferred spectrum users, such as “wireless microphones” and “emergency systems”

Minutes

- Taken by Paul Piggin
 - To be up-loaded
