To: Dr. Roger B. Marks
Chair, IEEE 802.16 Working Group on Broadband Wireless Access
Email: r.b.marks@ieee.org

Date: June 26, 2003

Dear Roger,

This meeting, the BRAN HIPERMAN group has made substantial progress in PHY, DLC and Profile work towards completion of the HM standard. In addition, an initial PICS draft has been adopted. These documents should be accessible through the BRAN mirror site. We appreciate your efforts in keeping the mirror site alive. We invite IEEE 802.16 to look at our improvements and continue to strive for a harmonized 2-11GHz wireless access standard.

A HM interim session is scheduled for August 12 to 14 to resolve final outstanding issues, with approval of the specifications by EP BRAN scheduled for September.

Due to the resignation of Nico van Waes, Marianna Goldhammer was elected HIPERMAN Area Co-ordinator.

With best regards,

Bernd Friedrichs,
ETSI BRAN chair
