

## Network Management Study Group, Proposed PARs

### IEEE 802.16 Presentation Submission

Document Number:

IEEE S802.16mgt-04/01

Date Submitted:

2004-05-11

Source:

David Johnston

Voice: 503 264 3855

Fax: 503 202 5047

E-mail: dj.johnston@intel.com, david.johnston@ieee.org

Venue:

May 2004 802.16 Interim, Shenzhen, China

Base Document:

Purpose:

Summarize and categorize inputs to the Network Management Study group.

Notice:

This document has been prepared to assist IEEE 802.16. It is offered as a basis for discussion and is not binding on the contributing individual(s) or organization(s). The material in this document is subject to change in form and content after further study. The contributor(s) reserve(s) the right to add, amend or withdraw material contained herein.

Release:

The contributor grants a free, irrevocable license to the IEEE to incorporate material contained in this contribution, and any modifications thereof, in the creation of an IEEE Standards publication; to copyright in the IEEE's name any IEEE Standards publication even though it may include portions of this contribution; and at the IEEE's sole discretion to permit others to reproduce in whole or in part the resulting IEEE Standards publication. The contributor also acknowledges and accepts that this contribution may be made public by IEEE 802.16.

IEEE 802.16 Patent Policy:

The contributor is familiar with the IEEE 802.16 Patent Policy and Procedures <<http://ieee802.org/16/ipr/patents/policy.html>>, including the statement "IEEE standards may include the known use of patent(s), including patent applications, provided the IEEE receives assurance from the patent holder or applicant with respect to patents essential for compliance with both mandatory and optional portions of the standard." Early disclosure to the Working Group of patent information that might be relevant to the standard is essential to reduce the possibility for delays in the development process and increase the likelihood that the draft publication will be approved for publication. Please notify the Chair <<mailto:chair@wirelessman.org>> as early as possible, in written or electronic form, if patented technology (or technology under patent application) might be incorporated into a draft standard being developed within the IEEE 802.16 Working Group. The Chair will disclose this notification via the IEEE 802.16 web site <<http://ieee802.org/16/ipr/patents/notices>>.

# Network Management SG Proposed PARs

David Johnston, Intel,  
[dj.johnston@intel.com](mailto:dj.johnston@intel.com)

# Proposed TGs

## MIB TG

- Fixed MIB
  - PAR NOW!
- Mobile MIBs
  - PAR Later

## Fixed and Mobile Management TG

- Define interfaces & Primitives
- Advanced Inter BS Signaling
  - Mobility performance gain
  - Mobility management gain
- MIB Access signaling
- SW Download?
- Billing?
- RRM
  - RRM Management signaling
  - BS-BS Interference mgmt

## Security TG

- PKMv2
- Efficient Link cipher
- Auth only Link cipher
- Crypt only Link cipher

## Reference Model AdHoc,

- Sync with WiMax, 802.21 & others
- Define and/or import Informative network models

**Meeting times for MIB & Security TGs can overlap**

# Security PAR

- Security PAR Purpose
  - Provide confidentiality of user information being transferred over the wireless medium and prevent unauthorized use of 802.16 services.
- Security PAR Scope
  - This document provides enhancements to the IEEE 802.16-RevD/802.16e MAC security sub-layer to provide confidentiality of user data and authorization and authentication between base stations and fixed and mobile subscriber stations.

# MIB Fixed PAR

- MIB PAR Purpose
  - Provide an ASN.1 definition of managed objects to enable standards based management of 802.16 devices
- MIB PAR Scope
  - This document provides enhancements to the IEEE 802.16-RevD standard to define a management information base (MIB) for the CS, MAC and PHY and associated management procedures
- Fixed + Mobile PAR not needed at this time

# Management PAR

- Network Management PAR Purpose
  - Provide 802.16 equipment with procedures to enable interoperable and efficient management of network resources, mobility and spectrum and to align 802.16 data and management plane interfaces with non 802.16 networks to which they attach
- Network Management PAR Scope
  - This document provides enhancements to the IEEE 802.16-RevD/802.16e standard CS, MAC and management entities to create standardized procedures and service interfaces for the management of conformant 802.16 devices
