| Re: | This is a response to a Call for Contribution on IEEE P802.16g | |
| Abstract | Proposal about the scope of IEEE802.16g | |
| Purpose | Discuss and adopt as the proposal about the scope of IEEE802.16g | |
| Notice | This document has been prepared to assist IEEE 802.16. It is offered as a basis for discussion and is not binding on the contributing individual(s) or organization(s). The material in this document is subject to change in form and content after further study. The contributor(s) reserve(s) the right to add, amend or withdraw material contained herein. | |
| Release | The contributor grants a free, irrevocable license to the IEEE to incorporate material contained in this contribution, and any modifications thereof, in the creation of an IEEE Standards publication; to copyright in the IEEE's name any IEEE Standards publication even though it may include portions of this contribution; and at the IEEE's sole discretion to permit others to reproduce in whole or in part the resulting IEEE Standards publication. The contributor also acknowledges and accepts that this contribution may be made public by IEEE 802.16. | |
| Patent Policy and Procedures | The contributor is familiar with the IEEE 802.16 Patent Policy and Procedures http://ieee802.org/16/ipr/patents/policy.html , including the statement "IEEE standards may include the known use of patent(s), including patent applications, provided the IEEE receives assurance from the patent holder or applicant with respect to patents essential for compliance with both mandatory and optional portions of the standard." Early disclosure to the Working Group of patent information that might be relevant to the standard is essential to reduce the possibility for delays in the development process and increase the likelihood that the draft publication will be approved for publication. Please notify the Chair mailto:chair@wirelessman.org > as early as possible, in written or electronic form, if patented technology (or technology under patent application) might be incorporated into a draft standard being developed within the IEEE 802.16 Working Group. The Chair will disclose this notification via the IEEE 802.16 web site http://ieee802.org/16/ipr/patents/notices >. | |

2004-08-20 IEEE 802.16g-04/04

The issues related with Roaming

Ki-Jun Lee, Dong-Cheol Lee, and Chi-Man Lee Dacom

1. Introduction

We should discussed to the issues related with Roaming between IEEE802.16 network and networks (ex; Cellular, PCS, 3G, WLAN etc) in IEEE802.16g.

Many people needs to provide data and voice service with one terminal, but wireless MAN network is a data-oriented networks, therefore IEEE802.16 network should be operated interworking with other wireless networks.

2. Proposal

We should be discussed to following issues in IEEE802.16g

Roaming with another service networks (Cellular, PCS, 3G, WLAN etc)

- Roaming security (Encryption etc)
- Mutual authentication
- · Accounting method
- Billing issues
- Procedures of mutual authentication
- Procedures or flows of accounting
- QoS issues
 - QoS parameter(delay, jitter, data rate, delay variance etc)
 - QoS related service defined

2. Conclusion

We should be discussed to above issues in IEEE802.16g to support efficient network configuration and management.
