Format Change for Figures 477 and 478

Peretz Feder - Lucent Technologies **Problem Definition** Figures 477 and 478 are hard to comprhened when combining call flows of serving and target BS within a single entity. Remedy Split the serving and target BS and show call flow exchange through the NCMS **Proposed Text Changes** Split Serving BS and Target BS call flows per below:

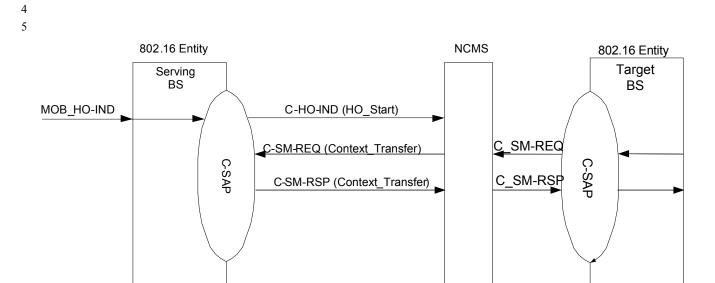

Figure 478 – Context transfer primitives initiated by a target BS

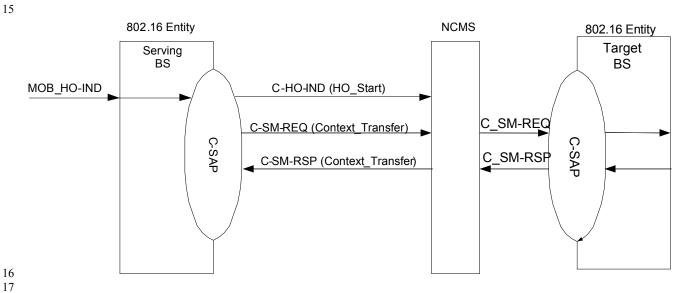

Figure 477 – Context transfer primitives initiated by a serving BS
