Re:	LB20c	
Abstract	The document proposes a motion to be considered by TG NetMAN when resolving comments on 802.16g	
Purpose	Decision	
Notice	This document has been prepared to assist IEEE 802.16. It is offered as a basis for discussion and is not binding on the contributing individual(s) or organization(s). The material in this document is subject to change in form and content after further study. The contributor(s) reserve(s) the right to add, amend or withdraw material contained herein.	
Release	The contributor grants a free, irrevocable license to the IEEE to incorporate material contained in this contribution, and any modifications thereof, in the creation of an IEEE Standards publication; to copyright in the IEEE's name any IEEE Standards publication even though it may include portions of this contribution; and at the IEEE's sole discretion to permit others to reproduce in whole or in part the resulting IEEE Standards publication. The contributor also acknowledges and accepts that this contribution may be made public by IEEE 802.16.	
Patent Policy and Procedures	The contributor is familiar with the IEEE 802.16 Patent Policy and Procedures < <a href="http://ieee802.org/16/ipr/patents/policy.html">http://ieee802.org/16/ipr/patents/policy.html</a> >, including the statement "IEEE standards may include the known use of patent(s), including patent applications, provided the IEEE receives assurance from the patent holder or applicant with respect to patents essential for compliance with both mandatory and optional portions of the standard." Early disclosure to the Working Group of patent information that might be relevant to the standard is essential to reduce the possibility for delays in the development process and increase the likelihood that the draft publication will be approved for publication. Please notify the Chair < <a href="mailto:chair@wirelessman.org">mailto:chair@wirelessman.org</a> > as early as possible, in written or electronic form, if patented technology (or technology under patent application) might be incorporated into a draft standard being developed within the IEEE 802.16 Working Group. The Chair will disclose this notification via the IEEE 802.16 web site < <a href="http://ieee802.org/16/ipr/patents/notices">http://ieee802.org/16/ipr/patents/notices</a> >.	

**Motion to revisit the resolution of comment 1032 received in LB20a**

*Carl Eklund*

*Nokia*

**1. Introduction**

Section 6.3.2.3.64 specifies a set of management signaling messages. The messages constitute an incomplete protocol definition for a protocol that aims to provide a means to do device management for 'non-managed' SSs. As discussed during the previous meeting in July of 2006 there are several issues with the current protocol definition. The current protocol besides being incompletely defined is incompatible with the current security architecture.

The Open Mobile Alliance has defined a set of protocols for device management. Furthermore they have defined protocols for location based services. These protocols run on top of IP and can be used with IEEE 802.16. As these protocols reside on layers above the MAC they fall outside the scope of P802.16. The messages of the OMA protocols are visible to the MAC as user plane traffic and thus there is little need for normative language related to these in the context of the 802.16g specification.

**2. Motion**

To change the resolution of comment 1032 to be 'accepted-modified' with the remedy being 'Delete section 6.3.2.3.64 and its subsections'.
