**3. ABSTRACT:** (a brief paragraph describing content of the presentation)  
The IEEE 802.16 Working Study Group on Mobile Multihop Relay was chartered in July 2006 and has submitted a PAR for consideration at the IEEE 802 Plenary of March 2006. This tutorial provides an overview of the discussions within the Study Group and presents some views of the problem. The presentations describe mobile multihop relay stations and configurations, demonstrating how they can enhance coverage, throughput, and system capacity of 802.16 networks. Preliminary technical analysis is included.
