

## Call for Contributions on Project 1802.16.2:

### ***10-66 GHz System Test Suite Structure and Test Purposes (TSS&TP) supporting IEEE Standard 802.16***

**Deadline: 12 January 2003**

On 11 December 2003, the IEEE-SA Standards Board approved Project Authorization Request (PAR) P1802.16.2 to develop a new IEEE Standard 1802.16.2. The PAR (IEEE 802.16-02/45r1 <[http://WirelessMAN.org/docs/02/80216-02\\_45r1.pdf](http://WirelessMAN.org/docs/02/80216-02_45r1.pdf)>) is entitled “Standard for Conformance to IEEE Standard 802.16 – Part 2: Test Suite Structure and Test Purposes (TSS&TP) for 10-66 GHz WirelessMAN-SC™ Air Interface” and has the scope statement:

*This standard represents the Test Suite Structure and Test Purposes (TSS&TP), per ISO/IEC Standards 9646-1, and 9646-2 (1995) and ITU-T Standards X.290 and X.291, for conformance specification of base stations and subscriber stations based upon the WirelessMAN-SC™ (10-66 GHz) air interface specified in IEEE Std 802.16.*

802.16’s Task Group C <<http://WirelessMAN.org/tgc>> has been assigned to develop the draft. In order to accommodate the PAR’s anticipated Sponsor Ballot initiation in March 2003, Task Group C intends to create a first draft by the end of Session #23 <<http://WirelessMAN.org/meetings/mtg23>> in January 2003 and open a Working Group Letter Ballot immediately thereafter.

This Call for Contributions requests input to further the work of the Task Group.

Contributions will be considered non-confidential and will be posted for public access on the 802.16 Web Site <<http://WirelessMAN.org>>.

Submit your contribution by the **deadline of 12 January 2003** following the instructions at <<http://WirelessMAN.org/submit.html>>. Make use of the “TGC” upload directory <<http://tgc.WirelessMAN.org>>
