

Call for Contributions on Project 1802.16.3:

10-66 GHz Radio Conformance Test (RCT) Specification supporting IEEE Standard 802.16

Deadline: 8 May 2003

On 20 March 2003, the IEEE-SA Standards Board approved Project Authorization Request (PAR) P1802.16.3 to develop a new IEEE Standard 1802.16.3. The PAR <<http://standards.ieee.org/board/nes/projects/1802-16-3.pdf>> is entitled “Draft Standard for Conformance to IEEE Standard 802.16 – Part 3: Radio Conformance Tests (RCT) for 10-66 GHz WirelessMAN-SC Air Interface.” It has the scope statement:

This standard represents the Radio Conformance Test (RCT) specification for base stations and subscriber stations based upon the WirelessMAN-SC (TM) (10-66 GHz) air interface specified in IEEE Standard 802.16.

802.16’s Task Group C <<http://WirelessMAN.org/tgc>> has been assigned to develop the draft. In order to accommodate the PAR’s anticipated Sponsor Ballot initiation in August 2003, Task Group C intends to create a first draft by the end of Session #25 <<http://WirelessMAN.org/meetings/mtg25>> in May 2003 and open a Working Group Letter Ballot immediately thereafter.

This Call for Contributions requests input relevant to the draft.

Contributions will be considered non-confidential and will be posted for public access on the 802.16 Web Site <<http://WirelessMAN.org>>.

Submit your contribution by the **deadline of 8 May 2003** following the instructions at <<http://WirelessMAN.org/submit.html>>. Make use of the “TGC” upload directory <<http://tgc.WirelessMAN.org>>
