Re:	IEEE 802.16Conf04-04/03 - Call for Contributions on Project 802.16/Conformance04 / 2004-07-21 - Conformance to IEEE 802.16 - Part 4: Protocol Implementation Conformance Statement (PICS) Proforma for Frequencies below 11 GHz	
Abstract	Proposal to use ETSI HiperMAN PICS document as base-line	
Purpose	Shorten the IEEE 802.16 development time related to FWA PICS for systems below 11GHz	
Notice	This document has been prepared to assist IEEE 802.16. It is offered as a basis for discussion and is not binding on the contributing individual(s) or organization(s). The material in this document is subject to change in form and content after further study. The contributor(s) reserve(s) the right to add, amend or withdraw material contained herein.	
Release	The contributor grants a free, irrevocable license to the IEEE to incorporate material contained in this contribution, and any modifications thereof, in the creation of an IEEE Standards publication; to copyright in the IEEE's name any IEEE Standards publication even though it may include portions of this contribution; and at the IEEE's sole discretion to permit others to reproduce in whole or in part the resulting IEEE Standards publication. The contributor also acknowledges and accepts that this contribution may be made public by IEEE 802.16.	
Patent Policy and Procedures	The contributor is familiar with the IEEE 802.16 Patent Policy and Procedures < http://ieee802.org/16/ipr/patents/policy.html >, including the statement "IEEE standards may include the known use of patent(s), including patent applications, provided the IEEE receives assurance from the patent holder or applicant with respect to patents essential for compliance with both mandatory and optional portions of the standard." Early disclosure to the Working Group of patent information that might be relevant to the standard is essential to reduce the possibility for delays in the development process and increase the likelihood that the draft publication will be approved for publication. Please notify the Chair < mailto:chair@wirelessman.org > as early as possible, in written or electronic form, if patented technology (or technology under patent application) might be incorporated into a draft standard being developed within the IEEE 802.16 Working Group. The Chair will disclose this notification via the IEEE 802.16 web site < http://ieee802.org/16/ipr/patents/notices >.	

Contribution on ETSI HiperMAN PICS

Mariana Goldhamer

ETSI HiperMAN Acting Chair

Introduction

In relation with the IEEE Liaison Letter IEEE L802.16-04/23, specifying: “We are interested in the idea of incorporating ETSI conformance standards by reference. We currently have an open project to develop a PICS for frequencies below 11 GHz, and this might be a suitable place to begin. You are welcome to submit a response to our Call for Contributions on this topic and might want to suggest therein that IEEE incorporate by reference the ETSI documents”, this document provides the necessary details.

Proposal

The proposal is to incorporate by reference the HiperMAN PICS standard, targeting PICS for FWA, to be published 2004.

The document can be accessed using the ETSI BRAN mirror site, using the following procedure:

- Go to [STF252/](#) (you will be asked for 802.16 login info)
- Enter the newest directory (at this moment is [Drafts_2004_06_19/](#))
- Download the zipped Drafts file, containing the HiperMAN testing drafts.

Conclusion

Using the HiperMAN PICS will permit to shorten the IEEE 802.16 development time related to FWA PICS for systems below 11GHz. Please consider this proposal and do not hesitate to make HiperMAN aware of any concerns you may have.
