Re:	Call for contributions IEEE 802.xx
Abstract	Proposal for mobility enhancements to 802.16a
Purpose	Editorial Corrections
Notice	This document has been prepared to assist IEEE 802.16. It is offered as a basis for discussion and is not binding on the contributing individual(s) or organization(s). The material in this document is subject to change in form and content after further study. The contributor(s) reserve(s) the right to add, amend or withdraw material contained herein.
Release	The contributor grants a free, irrevocable license to the IEEE to incorporate material contained in this contribution, and any modifications thereof, in the creation of an IEEE Standards publication; to copyright in the IEEE's name any IEEE Standards publication even though it may include portions of this contribution; and at the IEEE's sole discretion to permit others to reproduce in whole or in part the resulting IEEE Standards publication. The contributor also acknowledges and accepts that this contribution may be made public by IEEE 802.16.
Patent Policy and Procedures	The contributor is familiar with the IEEE 802.16 Patent Policy and Procedures <http://ieee802.org/16/ipr/patents/policy.html>, including the statement "IEEE standards may include the known use of patent(s), including patent applications, provided the IEEE receives assurance from the patent holder or applicant with respect to patents essential for compliance with both mandatory and optional portions of the standard." Early disclosure to the Working Group of patent information that might be relevant to the standard is essential to reduce the possibility for delays in the development process and increase the likelihood that the draft publication will be approved for publication. Please notify the Chair <mailto:chair@wirelessman.org> as early as possible, in written or electronic form, if patented technology (or technology under patent application) might be incorporated into a draft standard being developed within the IEEE 802.16 Working Group. The Chair will disclose this notification via the IEEE 802.16 web site <http://ieee802.org/16/ipr/ patents/notices>.

Editorial Changes for 802.16a

Ron Murias, Wi-LAN Inc.

1. Editorial Corrections

Note: these corrections are based on the 802.16a/D7 document.

Page 148, lines 37, 41, 52. A previous editorial correction had all references changed from "scrambler" to "randomizer" for consistency, but it appears these lines were missed in the corrections.

Page 157, Table 116 al is incorrect. The default is 1 subchannel, and it should contain, for example 768 coded bits per interleaved block. The table can be corrected by reversing the order of the column titles.
