Re:		
Abstract	Maintenance Ad Hoc Minutes for Session #32	
Purpose	Maintenance Ad Hoc Minutes for Session #32	
Notice	This document has been prepared to assist IEEE 802.16. It is offered as a basis for discussion and is not binding on the contributing individual(s) or organization(s). The material in this document is subject to change in form and content after further study. The contributor(s) reserve(s) the right to add, amend or withdraw material contained herein.	
Release	The contributor grants a free, irrevocable license to the IEEE to incorporate material contained in this contribution, and any modifications thereof, in the creation of an IEEE Standards publication; to copyright in the IEEE's name any IEEE Standards publication even though it may include portions of this contribution; and at the IEEE's sole discretion to permit others to reproduce in whole or in part the resulting IEEE Standards publication. The contributor also acknowledges and accepts that this contribution may be made public by IEEE 802.16.	
Patent Policy and Procedures	The contributor is familiar with the IEEE 802.16 Patent Policy and Procedures < http://ieee802.org/16/ipr/patents/policy.html >, including the statement "IEEE standards may include the known use of patent(s), including patent applications, provided the IEEE receives assurance from the patent holder or applicant with respect to patents essential for compliance with both mandatory and optional portions of the standard." Early disclosure to the Working Group of patent information that might be relevant to the standard is essential to reduce the possibility for delays in the development process and increase the likelihood that the draft publication will be approved for publication. Please notify the Chair < mailto:chair@wirelessman.org > as early as possible, in written or electronic form, if patented technology (or technology under patent application) might be incorporated into a draft standard being developed within the IEEE 802.16 Working Group. The Chair will disclose this notification via the IEEE 802.16 web site < http://ieee802.org/16/ipr/patents/notices >.	

Maintenance Ad Hoc Minutes for Session #32

Ken Stanwood

Cygnus Multimedia Communications

Start: 9:00 PDT 15 July 2004

Input:

- 206 comments
 - 189 submitted to corrigendum
 - 17 from TGe
- 14 contributions
 - 8 submitted to corrigendum
 - 6 from TGe

Process:

- Determine appropriate scope for corrigendum
- Review comments (filter, not resolve)
- Comments that are obviously not errata will be marked
- Comments will be left in data base but marked
- Comments that are not looked at will remain unmarked for the official task group to deal with
- Database will stay open to accept further comments when task group call for contributions occurs

Suggested process for task group preparation for Session #33:

- Call for comments should have deadline early enough to allow review of comments to determine if joint (as opposed to simultaneous) sessions are necessary for resolution of critical comments at Session #33.
- Reply comments to cover current and newly contributed comments.

In scope means:

- Corrects an error, or
- Reduces an ambiguity

Ruling a comment “in scope” does not imply the group accepted the comment. Similarly, ruling a comment “out of scope” does not imply that group disagreed with the comment. There were numerous situations where, had the Corrigendum Ad Hoc been resolving rather than filtering a comment ruled in scope would have been rejected. Similarly, there were comments ruled out of scope that were considered potentially useful enhancements, but not corrections.

Statistics:

Reviewed: 93
In scope: 85
Out of scope: 8
