Venue: IEEE 802.16 Session #47 London, UK

Base Document: None

Purpose: To assist TGM to define a work plan and schedule for the development of 802.16m standard

Notice:

This document has been prepared to assist IEEE 802.16. It is offered as a basis for discussion and is not binding on the contributing individual(s) or organization(s). The material in this document is subject to change in form and content after further study. The contributor(s) reserve(s) the right to add, amend or withdraw material contained herein.

Release:

The contributor grants a free, irrevocable license to the IEEE to incorporate material contained in this contribution, and any modifications thereof, in the creation of an IEEE Standards publication; to copyright in the IEEE's name any IEEE Standards publication even though it may include portions of this contribution; and at the IEEE's sole discretion to permit others to reproduce in whole or in part the resulting IEEE Standards publication. The contributor also acknowledges and accepts that this contribution may be made public by IEEE 802.16.

IEEE 802.16 Patent Policy:

The contributor is familiar with the IEEE 802.16 Patent Policy and Procedures <<http://ieee802.org/16/ipr/patents/policy.html>>, including the statement "IEEE standards may include the known use of patent(s), including patent applications, provided the IEEE receives assurance from the patent holder or applicant with respect to patents essential for compliance with both mandatory and optional portions of the standard." Early disclosure to the Working Group of patent information that might be relevant to the standard is essential to reduce the possibility for delays in the development process and increase the likelihood that the draft publication will be approved for publication. Please notify the Chair <<mailto:chair@wirelessman.org>> as early as possible, in written or electronic form, if patented technology (or technology under patent application) might be incorporated into a draft standard being developed within the IEEE 802.16 Working Group. The Chair will disclose this notification via the IEEE 802.16 web site <<http://ieee802.org/16/ipr/patents/notices>>.

Contents

- Introduction
- Documents to be Developed in TGm
- Proposed Work Plan
- Considerations for IMT-Advanced Schedule

Introduction

- This contribution contains a proposed work plan and schedule for the development of 802.16m standard.
- The goal is to develop 802.16m standard based on a competitive set of requirements that comply with ITU-R/IMT-Advanced and operators' requirements.
- The 802.16m standardization process shall include development of supporting documents such as system requirements, evaluation methodology, etc. that help specifying the most competitive and high performing technologies for 802.16m based on widely acceptable set of criteria.
- In the development of these supporting documents the ongoing efforts in WiMAX Forum and other standardization bodies should be considered and incorporated.
- The evaluation methodology should allow fair comparison of various technical schemes and to select the best-performing technology based on unified simulation criteria.

Documents to be Developed in TGm

- The contributors believe that TGm should develop the following documents as part of 802.16m standardization process:
 - System Requirements
 - A set of performance targets and features that 802.16m compliant systems shall meet or exceed.
 - Usage Models and Deployment Scenarios
 - A set of possible deployment scenarios and applications of the 802.16m standard.
 - Evaluation Methodology
 - A complete set of parameters, models, and methodologies for the link-level and system-level simulations that allow fair evaluation/comparison of various technical proposals.
 - Channels Models: A set of spatial channel model parameters are specified to characterize particular features of MIMO radio channels to be used for simulating technical proposals for the future 802.16m standard.
 - 802.16m baseline document (draft standards specification)

Proposed Work Plan

- The proposed work plan consists of three phases:
 - Initial/Requirements phase (1Q2007 – 2Q2007)
 - Development and ratification of the supporting documents
 - Technology development phase (3Q2007 – 4Q2007)
 - Call for proposals, technology submission, review of the technical proposals, and down selection.
 - Balloting phase (1Q2008 – 3Q2008)
 - Letter ballot and recirculation as well as sponsor ballot and recirculation.
- The proposed work plan would allow completion of the standard by Sept 2008 for approval by Dec 2008.
- An aggressive work plan is proposed to ensure that the standard provides a solution inline with the mobile industry needs.

TGm Proposed Schedule (1/2)

	2007		
IEEE Meetings	S#47, London	S#48, Orlando	S#49, Portland
TGm Documents	January	March	May
TGm Work Plan/Schedule	Create and Finalize Work Plan		
System Requirements	Discussion on Requirements. Adopt initial baseline requirements. Issue Call for contributions/ comments	Finalize Requirements Document	
Evaluation Methodology	Call for contributions issued	Discuss contributions; Adopt Initial Baseline; Issue Call for comments	Finalize Channel Models and Evaluation Methodology
Usage/Deployment Models	Call for contributions issued	Discuss contributions; Adopt Initial Baseline; Issue Call for comments	Finalize Usage/Deployment Models

TGm Proposed Schedule (2/2)

2007				2008						
S#49	S#50	S#51	S#52	S#53	S#54	S#55	S#56	S#57		
May	July	Sept	November	January	March	May	July	September	October	December
Call for Proposals Issued	Proposals Discussions. Adopt initial baseline working document; Continue Call for Proposals and Comments; Establish any adhoc for key topics	Proposals Discussions; Adopt more features into working document; Issue Call for comments	Proposals Discussions; Adhocs close work items; Improve features in working document; Issue Call for comments	Discuss Comments; First WG Draft and initiation of WG Letter Ballot	WG Letter Ballot Recirc	WG Letter Ballot Recirc	WG Sponsor Ballot	WG Sponsor Ballot Recirc	RevCom Submittal	RevCom/ IEEE-SA Approval

Considerations for IMT-Advanced Schedule
