

# 802.16m Closing Report

Session #53

January 24, 2008

Levi, Finland

# 802.16m Closing Report (Session #53)

- **Into Session #53 (Levi)**
  - 42 comments on EVM + 7 Contributions
  - 92 on-time contributions on SDD + 21 presentations (not counting revisions) – approx 10 minutes/contribution
  - 1 Late contribution (#202)

# 802.16m Closing Report (Session #53)

- **Results of the week:**

- Resolved all the Evaluation Methodology Comments (Commentary database 802.16m-08/001r2)
- Approved a baseline Evaluation Document (802.16m-08/004) based on the those comment resolutions
- Reviewed contributions on System Description Document (SDD) according to CfC
- Created an initial draft SDD (802.16m-08/003) with text for Network, System and Protocol Architectures (sections 4, 5, and 8)
- Issue Call for Comments and Contributions on the draft SDD (802.16m-08/005)
- Established a Rapporteur Process and Methodology for going forward (802.16m-08/006) and formed two initial groups (Frame Structure and UL Access Techniques)
- Identified potential issue with Network Architecture involving Relays and recommend a Joint Ad Hoc be formed between 802.16m and 802.16j (refer to C802.16m-08/065) to investigate further and recommend solutions
