802.17

Moving Forward on X.msr

Mike Takefman

Glenn Parsons

Next Steps

- ## Check validity of assumptions
  - Both 802.17 and ITU-T Q7/17
    - X.msr-rpr will support all classes of traffic

- ## Process / Mechanism for changes
  - Are these changes part of this PAR?
    - New Annex – X.msr profile and PICS for same
    - Changes to existing draft?

- ## Make decisions on requested changes
  - Motions made to WG and draft text / comments to be ready by March Plenary meeting

Proposed Process

- Creation of an Adhoc to close on
  - Research technical issues
  - Review latest X.msr draft and provide comments to SG 7/17
  - Evaluate methods for inclusion of changes required for support of X.msr in the 802.17 project:
    - Annex added to current draft
    - Changes made to current draft
    - New PAR

- Output of Adhoc is a recommendation to the WG on how to proceed

Motion

- Move to create an X.msr Adhoc Group to study and recommend to the working group the method for aligning P802.17 as a MAC for ITU-T Q7/17 X.msr at the March plenary. The Adhoc group to format any text using a format consistent with the annexes in Draft P802.17-D2.0.
