IETF Liaison Report on the RPR MIB

Discussion at IETF 54 (July 2002)

- Bert Wijnen - IETF OAM Area Director

- Thomas Narten - IETF Internet Area Director

- Frank Kastenholtz - IPoRPR co-chair

Options

- Discussed several options to publish the RPR MIB:

    1. IEEE only (like 802.1x)

    2. IETF only (like 802.3ae)

    3. IEEE & IETF (like 802.1d)

- Indicated 802.17 preference for #1

    - Agreed

Process

- Send stable RPR MIB (text) and RPR Draft (PDF) to:
  - OAM Area Director
  - IPoRPR WG
- OAM AD will review MIB syntax
- IPoRPR WG will provide MIB comments
  - Currently WG is in hibernation
  - Future work unclear, recharter likely in November
- 802.17 will publish RPR MIB, IETF will not

Motion

- Authorize 802.17 OAM Editor to send the RPR MIB (text) and RPR Draft (PDF) to the IETF (OAM AD & IPoRPR WG) for sanity check on MIB after 802.17 authorizes first ballot.
