RE: TR-42 Liaison to IEEE 802.3 Working Group

Dear Mr. Law,

TIA TR42.9 Subcommittee has approved a new project request for creating an addendum to ANSI/TIA-1005-A for defining the transmission and environmental requirements for industrial cabling and components supporting 1000BASE-T1 over one pair Link Segment Type B including in MICE2 and MICE3 environments.

We would appreciate any input regarding this initiative and will provide you with ongoing status reports and data as it becomes available.

Sincerely,

Ray Emplit  
Chair, TIA TR-42
