5.2.a. Scope of the complete standard: The scope of this standard is to define the Media Access Control (MAC) Service provided by all IEEE 802(R) MACs, and the Internal Sublayer Service (ISS) provided within MAC Bridges, in abstract terms of the following: a) Their semantics, primitive actions, and events; and b) The parameters of, interrelationship between, and valid sequences of these actions and events.

5.2.b. Scope of the Proposed changes: Change the value of the LLC Encapsulation Ethertype to the correct value.

5.3 Is the completion of this standard dependent upon the completion of another standard: No

5.4 Purpose: This document will not include a purpose clause.

5.5 Need for the Project: 802.1AC-2016 contained an assignment of the LLC Encapsulation Ethertype which is not consistent with industry practice.

It is necessary to correct this error.

5.6 Stakeholders for the Standard: Implementors and users of Networking equipment that bridges between 802.3 and 802.11 media.
