
P802.1Qdq

Submitter Email:**Type of Project:** Amendment to IEEE Standard 802.1Q-2018**Project Request Type:** Initiation / Amendment**PAR Request Date:****PAR Approval Date:****PAR Expiration Date:****PAR Status:** Draft**Root Project:** 802.1Q-2018

1.1 Project Number: P802.1Qdq**1.2 Type of Document:** Standard**1.3 Life Cycle:** Full Use

2.1 Project Title: IEEE Standard for Local and Metropolitan Area Networks--Bridges and Bridged Networks

Amendment: Shaper Parameter Settings for Bursty Traffic Requiring Bounded Latency

3.1 Working Group: Higher Layer LAN Protocols Working Group(C/LM/802.1 WG)**3.1.1 Contact Information for Working Group Chair:****Name:** Glenn Parsons**Email Address:** glenn.parsons@ericsson.com**3.1.2 Contact Information for Working Group Vice Chair:****Name:** Jessy Rouyer**Email Address:** jessy.rouyer@nokia.com**3.2 Society and Committee:** IEEE Computer Society/LAN/MAN Standards Committee(C/LM)**3.2.1 Contact Information for Standards Committee Chair:****Name:** Paul Nikolich**Email Address:** p.nikolich@ieee.org**3.2.2 Contact Information for Standards Committee Vice Chair:****Name:** James Gilb**Email Address:** gilb@ieee.org**3.2.3 Contact Information for Standards Representative:****Name:** James Gilb**Email Address:** gilb@ieee.org

4.1 Type of Ballot: Individual**4.2 Expected Date of submission of draft to the IEEE SA for Initial Standards Committee Ballot:**
Mar 2022**4.3 Projected Completion Date for Submittal to RevCom:** Nov 2022

5.1 Approximate number of people expected to be actively involved in the development of this project: 30**5.2.a Scope of the complete standard:**This standard specifies Bridges that interconnect individual LANs, each supporting the IEEE 802 MAC Service using a different or identical media access control method, to provide Bridged Networks and VLANs.**5.2.b Scope of the project:** This amendment adds an informative annex that describes recommended shaper parameter settings for bursty traffic requiring bounded latency.**5.3 Is the completion of this standard contingent upon the completion of another standard?** No**5.4 Purpose:** Bridges, as specified by this standard, allow the compatible interconnection of information technology equipment attached to separate individual LANs.**5.5 Need for the Project:** Many networks serve traffic with a variety of characteristics including bursty traffic, such as the one generated from Internet of Things (IoT) devices, which requires traffic to be conveyed between end stations with bounded latency. Shaping is needed to mitigate the impact of a temporarily high network load caused by this bursty traffic that shares a port with other traffic, and to reduce over-provisioning of bandwidth reservation, while ensuring its delivery within its delivery time tolerance.**5.6 Stakeholders for the Standard:** Developers, providers, and users of networking services and equipment for systems requiring bursty traffic to be delivered with bounded latency.

6.1 Intellectual Property

6.1.1 Is the Standards Committee aware of any copyright permissions needed for this project?

No

6.1.2 Is the Standards Committee aware of possible registration activity related to this project?

No

7.1 Are there other standards or projects with a similar scope? No

7.2 Is it the intent to develop this document jointly with another organization? No

8.1 Additional Explanatory Notes: None
