

IEEE P802.1DP Editors Report

IEEE P802.1DP / SAE TSN Profile for Aerospace *Editors Report*

Abdul Jabbar
GE Aerospace Research

Objective

- ***Editors report on the draft***

Editor's Report

- Last balloted Draft: 2.0
- IEEE working group ballot on Draft 2.0 passed with 85% approval
- SAE AS-1A committee ballot on Draft 2.0 passed with 85% approval
- All comments were resolved by the joint working group
- Disposition of comments from both IEEE and SAE published
<https://www.ieee802.org/1/files/private/dp-drafts/d2/802-1DP-d2-0-dis-v01.pdf>
- Draft 2.1 (as per comment disposition) is being prepared for WG recirculation and SAE affirmation ballot. Intermediate not-for-ballot draft will be posted prior to recirculation ballot.
- Fault-tolerant timing pulled out of the DP draft. It will be instead developed as an amendment to AS (pending Nescom approval by 802)
- DP Draft 2.1 may be dependent on on ASed draft for reference

Next Steps

- WG recirculation ballot and SAE affirmation ballot to run concurrently
- Targeting motion for SA ballot in Nov plenary
