Date: July 18, 2024

Dear Colleagues,

The IEEE 802.1 Working Group would like to thank Avnu Alliance for the information provided in liaison statement <https://www.ieee802.org/1/files/public/docs2024/liaison-RAP-MSRP-backwards-compatibility-AvnuAlliance-0724.pdf> about RAP/MSRP backwards compatibility requirements in the P802.1DD PAR.

We would like to inform you that we have included the following sentence in section 5.2 scope of the draft Project Authorization Request (PAR) of the proposed IEEE P802.1DD project: “This standard makes provisions for backward compatibility with the Stream Reservation Protocol specified in IEEE Std 802.1Q.” (<https://www.ieee802.org/1/files/public/docs2024/dd-PAR-0724-v01.pdf>)

We look forward to continued collaboration between our organizations. We encourage individuals interested in the development of the IEEE P802.1DD project to participate and contribute to the work.

Note that the IEEE 802 work is open and contribution driven. **Participation is on an individual basis and technical discussion can be conducted based on individual contributions.** The TSN Task Group holds regular electronic meetings: details are available at <https://1.ieee802.org/wg-calendar>.

Respectfully submitted,
Glenn Parsons
Chair, IEEE 802.1 Working Group
