Date: July 16, 2026

Dear Colleagues,

The IEEE 802.1 Working Group would like to thank LNI 4.0 for the information provided in liaison statement <https://www.ieee802.org/1/files/public/docs2026/liaison-LNI40-access-to-drafts-0726.pdf> about access to IEEE 802.1 drafts.

Thank you for updating us on your efforts, which we appreciate for facilitating the adoption of Time-Sensitive Networking.

We would like to inform you that IEC/IEEE 60802 has been published and is available at the [IEEE Standards Store](#), at [IEEE Xplore](#), and at the [IEC Webstore](#).

We have made IEEE P802.1DD Draft 2.0 available to you on our website. It is subject to IEEE copyright as is indicated on the cover page of the document. If you copy the document to your site, please store it for LNI 4.0 use with password-protected access.

We look forward to the continued collaboration between our organizations, e.g., we would welcome your comments on Draft 2.0, which is the draft for initial Working Group ballot.

Note that the IEEE 802 process is open and contribution driven. Participation is on an individual basis and technical discussion can be conducted based on individual contributions. The TSN Task Group holds regular electronic meetings: details are available at <https://1.ieee802.org/wg-calendar>.

Respectfully submitted,
Glenn Parsons
Chair, IEEE 802.1 Working Group
