This paper is intended to inform the committee of certain patents held by Norand Corporation that are relevant to subject matter now under discussion by the committee. These patents are:

US 4,910,794  
Mobile Radio Data Communications System and Method  
Ronald L Mahany  
Issued March 20, 1990

US 5,070,536  
Mobile Radio Data Communications System and Method  
Ronald L Mahany, Marvin L Sojka, Guy J West  
Issued: December 3, 1991

and the following international issues of the above:

Australia 632,055  
Canada 1,316,218  
Great Britain 2,223,914

The general subject matter of these patents is adaptive selection between radio link data rates to improve transmission reliability.
