Liaison Letter from IEEE P802.10
re Compression

November 10, 1993

Mr. Vic Hayes
Chair IEEE 802.11
NCR Systems Engineering B.V.
Zadelstede 1-10
NL3431 JL Nieuwegein
The Netherlands

Dear Vic,

As discussed in a joint meeting today, November 10, 1993, between IEEE 802.10 and members of your working group, it was noted that Secure Data Exchange (SDE) accommodates both compression and encryption. It should be noted that compression and encryption must be applied to each SDE Service Data Unit, since SDE is a connectionless protocol.

Sincerely,

Kenneth G. Alonge
Chair, IEEE 802.10
