

LMSC Standard Motion for conditional approval to forward a Draft Standard

Mover: _____
Second: _____

Date: _____
Time: _____

Moved:

That, at the request of Working Group 802.____, the LMSC Sponsor Executive Committee authorize {full document title and identifier} to be forwarded to {LMSC Sponsor Ballot | RevCom | NesCom} following a {Working Group | LMSC Sponsor} confirmation ballot with the conditions stated below. The initial ballot {has | will} close on the {final | current} vote tally being ____ Approve, ____ Disapprove, ____ Abstain. Disapprove votes have been addressed to the satisfaction of the voting member and are included in the Approve total above. The 802.____ Working Group has been unable to satisfy the remaining Disapprove votes for the following reasons:

Conditions:

1. That the {Working Group | Sponsor} confirmation ballot, scheduled for completion on _____, completes with no new technical issues being raised by confirmation ballot comments. Confirmation ballot comments are limited to the text changed in the draft since the initial ballot circulation and any text related directly or indirectly to changed text. Any issue, accompanying a confirmation ballot negative vote, that has not been addressed in its entirety as part of the current ballot shall be deemed a new negative vote without regard for the voter's previous vote.
2. If the current ballot has not already closed, any negative vote received by the published close date above shall nullify the forwarding authority granted above, with the exception of a negative vote that is identical in all respects to a negative vote already received and addressed above.
3. Confirmation ballot comments may be considered at an interim meeting of the Working Group that convenes at least 14 days after the close of the confirmation ballot and that has a quorum present. Any negative vote that is resolved without technical change to the draft standard shall not be deemed a negative vote for the purpose of Condition 2.
4. Any technical change to the draft standard after the initiation of the confirmation ballot shall nullify the forwarding authority granted above; in such case a second and final confirmation ballot shall be conducted before again requesting the forwarding of this draft, such request being made without conditions, unless the Working Group deems it more appropriate to produce a new draft and start the balloting process anew.

For the information of the LMSC Executive Committee:

The Working Group vote requesting this approval was ____ Approve, ____ Disapprove, ____ Abstain

LMSC Motion results: ____ Approve, ____ Disapprove, ____ Abstain
