5.1 Approximate number of people expected to work on this project: 300	
5.2 Scope of Proposed Standard: This amendment provides an advanced air interface to meet the requirements of next generation mobile networks. This standard is intended for incorporation into the IMT-Advanced standardization activity being conducted by the International Telecommunications Union – Radiocommunications Sector (ITU-R). The amendment is based on the WirelessMAN-OFDMA specification and provides continuing support for legacy subscriber stations.	Old Scope:
5.3 Is the completion of this standard is dependent upon the completion of another standard: Yes If yes, please explain: The project is dependent on the completion of IMT-Advanced requirements on a timely basis.	
5.4 Purpose of Proposed Standard: The purpose of this standard is to update the WirelessMAN-OFDMA air interface in accordance with the requirements defined for the internationally agreed radio interface standards for next generation mobile networks such as IMT-Advanced.	Old Purpose:
5.5 Need for the Project: The International Telecommunications Union – Radiocommunications Sector (ITU-R), is preparing to develop the IMT-Advanced radio interface standards to provide advanced air interface specifications for mobile telecommunications. Under the current schedule, initial proposals for IMT-Advanced are anticipated to be solicited for mid-2008, and standardization is expected to continue through 2009. This project will seek to develop an advanced IEEE 802.16 air interface by working cooperatively with ITU-R and its members.	
5.6 Stakeholders for the Standard: Vendors developing IEEE 802.16 products, and customers using IEEE 802.16 products, are interested parties in the development of this amendment project. In addition, ITU-R and the members of ITU-R are interested parties.
