Subject: Coordination of P1900.7 draft PAR

Dear Roger and Mariana,

P1900.7 PAR "MAC and PHY Specification for Fixed and Mobile Operation of White Space Dynamic Spectrum Access Radio Systems" was submitted for January NesCom teleconference. NesCom decided to defer the decision on the PAR until March NesCom meeting. One of the comments I received was request to perform coordination with relevant 802 WGs. Following this request I would like to coordinate the PAR with your WG and/or relevant TG of your WG.

Attached are three files:

- Introduction to P1900.7
- PAR
- 5C.

NesCom meeting will be on March 30. To have enough time to resolve comments from your WG, I would like to ask you to provide comments by March 18, 2011.

I would really appreciate an opportunity to present P1900.7 to your WG and/or relevant TG during one of the nearest teleconferences and answer any questions.

Also, I will be participating in 802 plenary in Singapore, where we can take additional coordination efforts as needed.

If you have any questions or comments, please let me know.

Thank you.

Best regards, Stanislav Filin.
