

# 1. Introduction

1.1. *Purpose / Scope*

1.2. *References*

# 2. System Overview

2.1. *Service Description*

2.1.1. Target Markets

**2.1.1.1. Commercial**

2.1.1.1.1. Large

2.1.1.1.2. Medium

2.1.1.1.3. Small

**2.1.1.2. Residential**

2.1.1.2.1. Multi-tenant

2.1.1.2.2. High-density suburban

2.1.1.2.3. Suburban

2.1.2. Target Services

**2.1.2.1. Isochronous**

2.1.2.1.1. Voice

2.1.2.1.2. Video Conference

**2.1.2.2. Asynchronous**

2.1.2.2.1. Data

2.1.2.2.2. Video

2.1.2.2.3. Voice

2.2. *System Description*

2.2.1. Overview / Operational concepts

2.2.2. Reference Architectures

**2.2.2.1. Network Topology**

2.2.2.1.1. Traffic

2.2.2.1.2. Cell Layout

**2.2.2.2. Cell Architecture**

**2.2.2.3. Link Architecture**

2.2.3. External interfaces

2.3. *Functional Requirements*

2.3.1. Transport

**2.3.1.1. Capacity requirements**

2.3.1.1.1. By Service

2.3.1.1.2. By Architecture

2.3.1.1.3. Flexibility / On-Demand

**2.3.1.1.4. Interfaces**

2.3.1.1.5. Payload Transport

2.3.1.1.5.1. *User*

2.3.1.1.5.2. *Hub*

2.3.1.1.6. Management, Control, and Status

**2.3.1.2. Quality of Service**

2.3.1.2.1. Differentiated services

**2.3.1.3. Synchronization**

**2.3.1.4. Security**

2.3.2. Management, Control, and Status

**2.3.2.1. Layer management**

**2.3.2.2. Operational, administrative, maintenance,  
and provisioning**

**2.3.2.3. Billing**

**2.4. *Performance Requirements***

2.4.1. Transport

**2.4.1.1. Availability**

**2.4.1.2. BER**

**2.4.1.3. Latency**

2.4.2. Management, Control, and Status

**3. Appendices**

**3.1. *Glossary***
