

TG2 Session#15 Closing Report

- A small but active group worked on several contributions
- A first set of simulation results was agreed
- A 10.5 GHz channel model was selected (2-ray model)
- A first (incomplete) working document/outline was prepared
- The project is on - track relative to the timeline.
- Several output documents are available on the server
- Draft minutes are on the server
- Significant input is expected for the next meeting, including further simulation results (an action list is attached to the minutes)
