

*Task Group Review of IEEE 802.16e-03/07r2*  
**IEEE 802.16 Task Group e**

**Deadline: 14 July 2003**

Task Group e (on “Mobile Wireless MAN”) of the IEEE 802.16 Working Group on Broadband Wireless Access has developed an initial working document (IEEE 802.16e-03/07r2) constructed as an amendment to the baseline IEEE 802.16 Standard, as previously amended by IEEE 802.16a and 802.16c. The working document is based on submitted contributions, with refinement to follow.

The Task Group is now seeking to refine this Working Document in preparation for submission to a Working Group Letter Ballot, planned for July 2003. This Task Group Review invites comments on IEEE 802.16e-03/07r2 for consideration at Session #26 (21-25 July 2003 at the Hyatt Regency Embarcadero, San Francisco, CA, USA).

Commenters are encouraged to be thorough and concise. Comments must identify specific concerns or areas to address and should propose specific text changes to the Working Document. It should be noted that the Task Group Chair has specifically requested that contributors/commenters provide performance data, either actual or simulated, in support of proposed changes.

To submit comments (with or without an associated contribution), use the standalone program *Commentary* (version 1.5 or higher). *Commentary* is available at: <<http://ieee802.org/16/docs/Commentary>> Submission instructions are included. Do not e-mail comments; instead upload all comments and contributions to <<http://tge.wirelessman.org>> by the **deadline of 14 July 2003** following the instructions at <<http://WirelessMAN.org/submit.html>>.

Comments and contributions will be posted to the 802.16 Web Site.
