Re:	802.20 Technical Requirements	
Abstract	<p>This contribution establishes some background for and some technical requirements related to the co-existence portion of the 802.20 Technical Requirements Draft. Currently the section (in outline form) exists as an “appendix” to the draft coexistence document. After presenting some background on the applicability and need for at least an initial study of coexistence to be part of the 802.20 standards drafting process, we present a suggested update to the draft coexistence section.</p>	
Purpose	<p>The intent of this contribution is to establish a first draft section of the 802.20 technical requirements document. The authors request that 802.20 adopt the section herein enclosed as a full and bona-fide section of the document.</p>	
Notice	<p>This document has been prepared to assist the IEEE P802.20. It is offered as a basis for discussion and is not binding on the contributing individual(s) or organization(s). The material in this document is subject to change in form and content after further study. The contributor(s) reserve(s) the right to add, amend or withdraw material contained herein.</p>	
Release	<p>The contributor acknowledges and accepts that this contribution becomes the property of IEEE and may be made publicly available by P802.20.</p>
