PAR and CSD
Automotive vs. Industrial

IEEE 802.3

ISAAC Study Group

Kamal Dalmia

Aviva Links Inc.

Sept 27, 2023

Introduction

- This presentation relates to the item of "Building and Industrial Automation"

- Question on the table is whether this element should be included in the PAR and related wording be made part of the CSD?

Observations

- CFI deck did NOT mention "Building and Industrial Automation"

- CFI was very specific to Automotive

- The goal of the project was clearly stated as an optimized PHY for high-volume Automotive Camera application

- Since this item came up at the Campinas meeting, the group needs to decide how to move forward

How to gauge Interest?

- Level of **participation** is a good way to assess interest! Meaningful interest in participation should be considered as a key part of the criteria for inclusion.
- Propose holding CFI style straw polls to assess level of participation.

Straw Poll #1

I would focus on the "Automotive" aspects in the Study Group

Y: N: A:

Straw Poll #2

I would participate in "Building and Industrial Automation" aspects in the Study Group

Y: N: A:

Straw Poll #3

I believe my affiliation would support my participation in the "Building and Industrial Automation" aspects in the Study Group

Y: N: A:

Thank You!
