

Sensors Data Rate Requirements

IEEE ISAAC Study Group Meeting
Haim Ringel
General Motors

Camera – Data Rate

- Downlink
 - More than 10Gbps
- Uplink
 - < 100 Mbps
- High pixel automotive CMOS image sensor (CIS)
 - 8MP, 60fps - ~9 Gbps
 - A few companies supporting 12MP 30fps - ~10 Gbps
 - Sony – [17.42 MP \(Sample Sep-23\)](#) 30fps - ~15Gbps

Radar – Data Rate

- Satellite architecture
 - Downlink
 - More than 10Gbps - ~10 - 20Gbps (4 x MMIC)
 - MMIC sampling rate and Number of Rx channels are getting higher
 - Uplink
 - < 100 Mbps

Summary

- Upcoming automotive camera sensors and radars will exceed 10Gbps downstream
- In order to support these automotive applications, recommend updating the project objectives to support higher than 10Gbps Downstream
