Subject: Liaison letter to CableLabs on Ethernet Bandwidth Assessment

Approval: Agreed to at IEEE 802.3 interim meeting, Spokane, WA, USA, 13 Sept 2018

Dear Mr. Reuss ,

The IEEE 802.3 Ethernet Working Group would like to inform Euro-IX and its members that it has begun the task of updating its 2012 Ethernet Bandwidth Assessment. This effort will focus on gathering information throughout 2019 that will enable an evaluation of the future bandwidth needs of various Ethernet wireline applications, such as core networks, mobile networks, access networks, enterprise networks, and computing. It should be noted that the role of this assessment will be to gather information, not make recommendations or initiate a new project within the IEEE.

This evaluation will be performed within the IEEE 802.3 New Ethernet Applications (NEA) Ad hoc and will enable the generation of material that can be used for future reference by an appropriate related standards activity. The IEEE 802.3 NEA Ad Hoc operates using both face-to-face and teleconference meetings, at which the Ad Hoc encourages individuals with relevant information to participate and provide input. The group's website is [http://www.ieee802.org/3/ad\\_hoc/bwa2/index.html](http://www.ieee802.org/3/ad_hoc/bwa2/index.html), and a general overview can be found at [http://www.ieee802.org/3/ad\\_hoc/ngrates/public/18\\_09/dambrosia\\_bwa\\_01\\_0918.pdf](http://www.ieee802.org/3/ad_hoc/ngrates/public/18_09/dambrosia_bwa_01_0918.pdf).

---

<sup>1</sup> This document solely represents the views of the IEEE 802.3 Working Group, and does not necessarily represent a position of the IEEE, the IEEE Standards Association, or IEEE 802.

Given recent decisions within the IEEE 802.3 Ethernet Working Group to develop 100 GbE and 400 GbE optical PHYs for operation over DWDM networks, we are reaching out to Cable Labs for any information regarding the future bandwidth demands of cable / MSO distribution networks. These networks have been cited as examples needing the referenced PHYs above, which explains our interest in any information related to their future bandwidth requirements.

We look forward to any information that CableLabs would be willing to share with us for this endeavor. If there are any questions, please feel free to contact John D'Ambrosia, Chair, IEEE 802.3 NEA Ad hoc, at [jdambrosia@ieee.org](mailto:jdambrosia@ieee.org).

Sincerely,

David Law

Chair, IEEE 802.3 Ethernet Working Group
