

## **RL Channel Variations with Similar ILD's**

# Two High ILD channel

- high\_ILD\_at\_AFmax\_Thru.s4p
  - Excessive low end RL
- high\_ILD\_at\_AFmax\_Thru\_at\_limit.s4p
  - RL at limit
- Both Channel have about the same ILD
- Both Channels are the ICR limit with high\_ILD\_at\_ICR\_crosstalk.s4p

# RL differences

# Small differences in ILD
