

Informal Update from ISO SC25 WG3 Meeting in Jeju, Korea Regarding Remote Powering (PoE)

Diab, Wael William – Broadcom

List of Supporters

Carlson, Steve – HS Design

Flatman, Alan – LAN Technologies

Law, David – 3COM

Thompson, Geoff – Nortel

Brief Update

- Productive meeting
 - Several contributions discussed
- No liaisons received from TC 64 and 108 yet
- Liaison response will be coming into 802.3
 - No special tests for cable & connectors to support PoE
 - IEC cable temperature measured at conductor surface, not cable surface.
- Continued work on generic test in SC48 on de-mating under load
- ISO to start a new project looking at higher power
 - Will provide temperature de-rating vs. current-capacity data
