

L2 Update

IEEE 802.3at Task Force

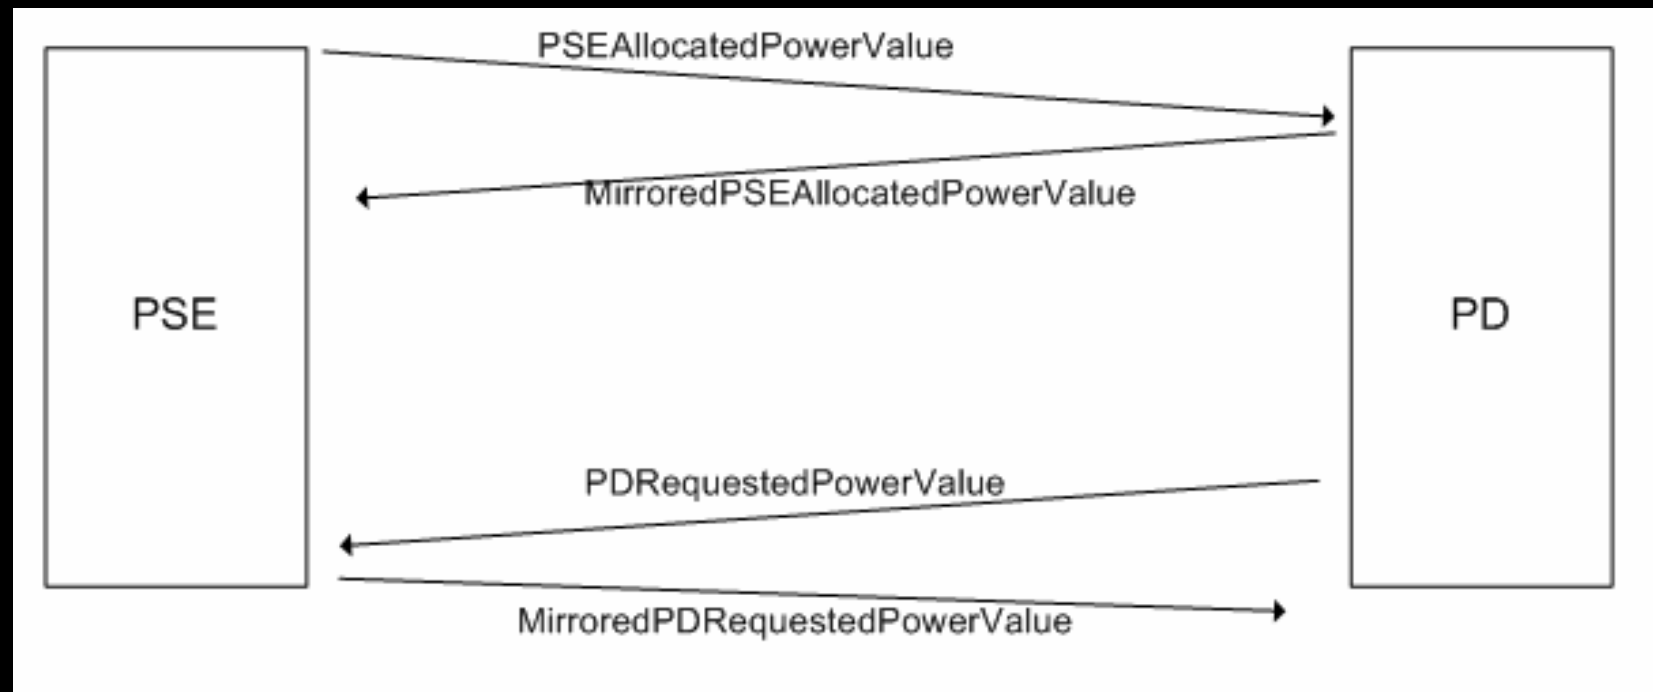

Anoop Vetteth

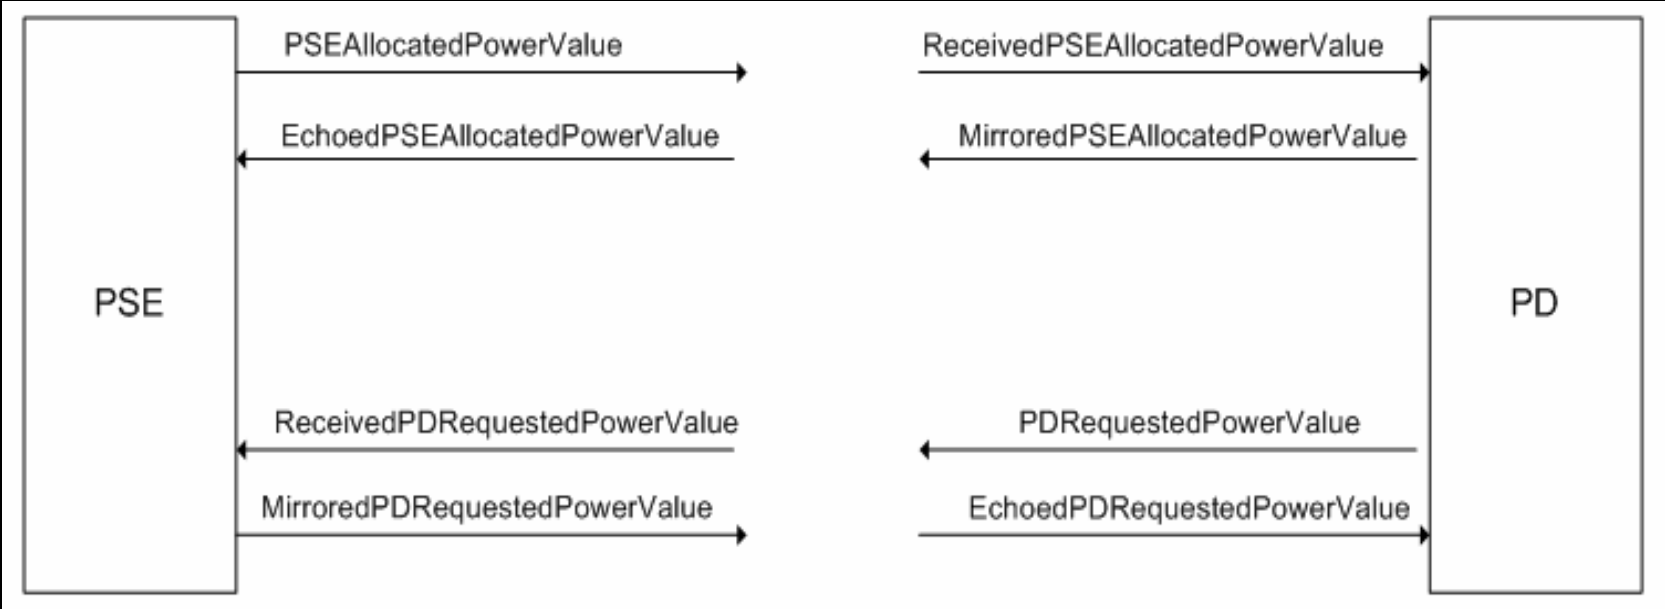

Bug in State Machine adopted in NH

Present Mirroring Scheme

Proposed New Mirroring Scheme

Continued

- The Mirrored value is the received value corresponding to which the power review is conducted
- If a PSE receives a PDU where the echoed value does not match the Allocated Power Value, it ignores the PDU
- If a PD receives a PDU where the echoed value does not match the Requested Power Value, it continues to treat the PDU as valid
