Everyone on the call was familiar with the IEEE patent policy.

EPoC TDD Proposal – Yan Kezhou (Xidian University)

Q: How does the MAP Frame relate to the EPON Gate message?
A: The EPON Gate message can be converted to a MAP Frame.

Q: Is this presentation the same as last week's presentation?
A: Peking University presentation last week is part of PHY. This presentation is part of MAC.

Q: So the two presentations go together.
A: Yes

Local Grant Identification for EPOC TDD (baseline proposal amendment)
Andrea Garavaglia and Patrick Stupar (Qualcomm)

C: On slide 7 you need to add the Local Grant to both branches of the state machine
A: We can look into that

C: I think the new primitive would be better accepted by the WG

C: I prefer option #2.

C: We will update the presentation and next week we can hold a straw poll

C: Better to keep a single state machine.

Attendance

Person	Affiliation
Zhang Cheng	Peking University
Lixia Deng	Peking University
Hesham ElBakoury	Huawei
Andrea Garavaglia	Qualcomm
Zhao Hui	Peking University
Bill Keasler	Ikanos
Yan Kezhou	Xidian University
Curtis Knittle	CableLabs
Bill Powell	Alcatel Lucent
Duane Remein	Huawei
Steve Shellhammer	Qualcomm
Joe Solomon	Comcast
Patrick Stupar	Qualcomm

Ron Wolfe	Aurora Networks
Yuping Zhao	Peking University
