

# TASK FORCE TIMELINE UPDATE

Kent Lusted, Intel Corporation

12 August 2020

# Current IEEE P802.3ck Timeline

(Adopted Revision July 2019, see [https://www.ieee802.org/3/ck/P802\\_3ck\\_Timeline\\_18july19.pdf](https://www.ieee802.org/3/ck/P802_3ck_Timeline_18july19.pdf))

Enough direction to write a draft

Technical Completeness

Major changes Complete

— Plenary meeting

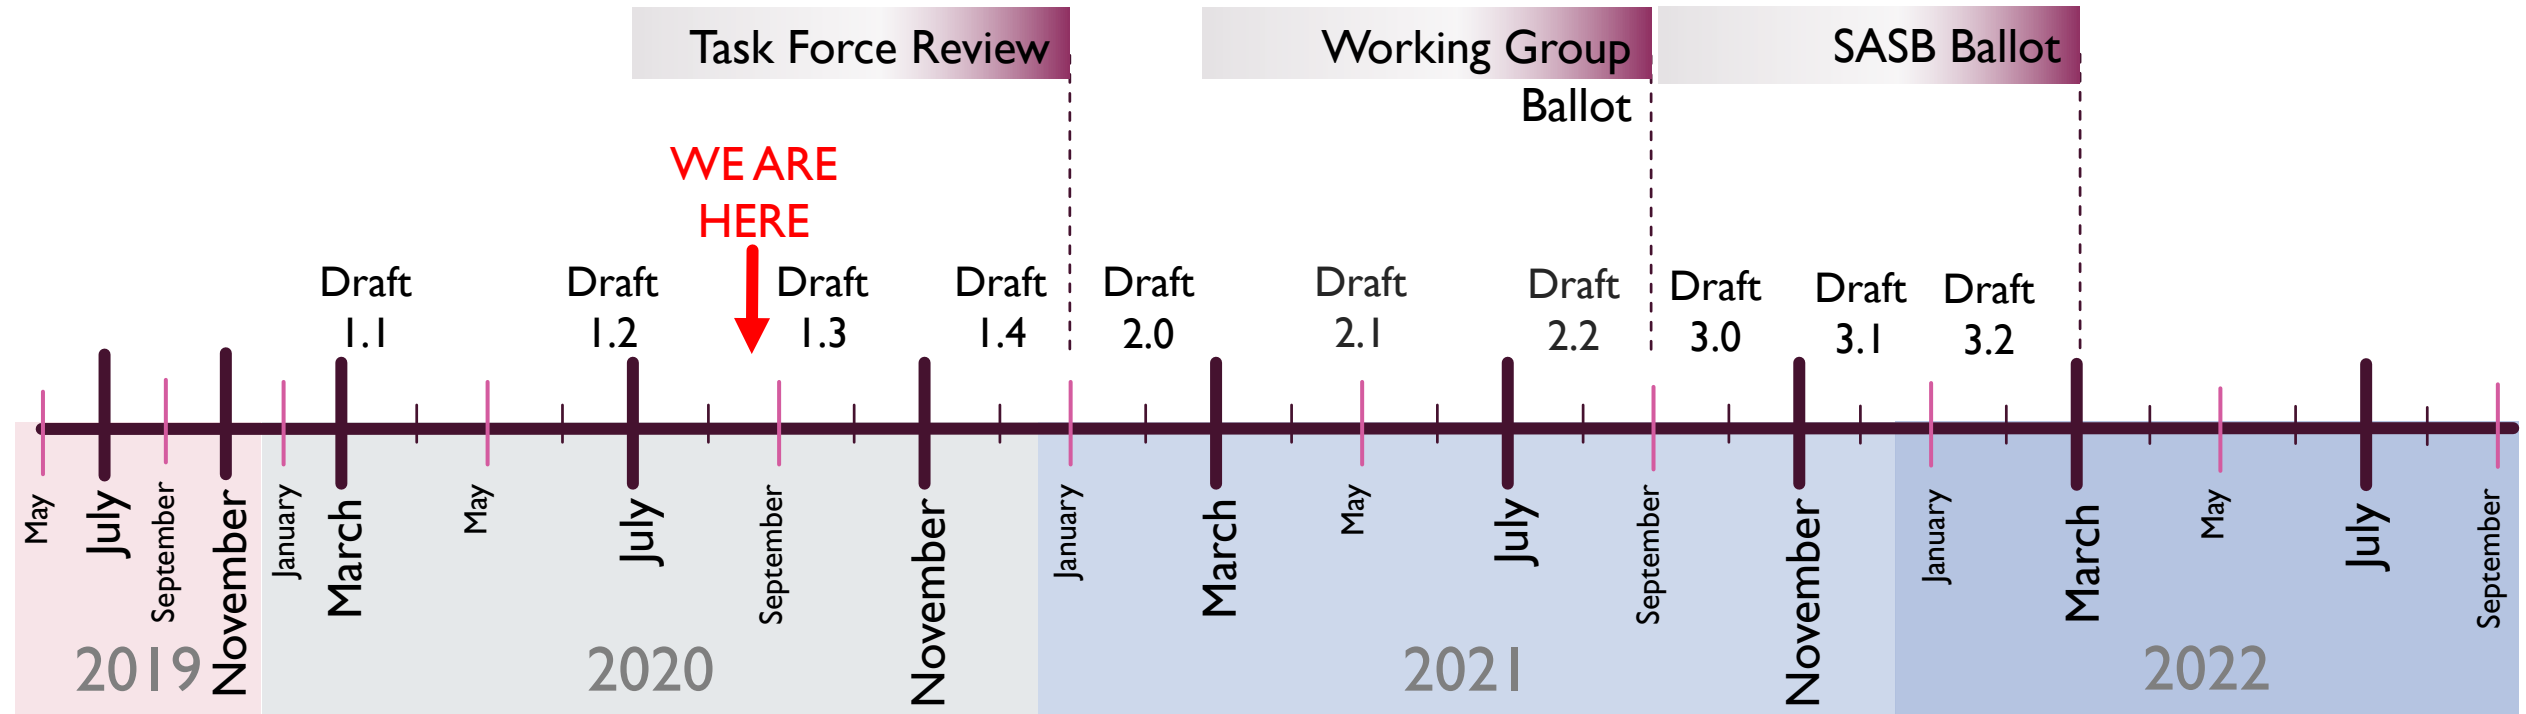

— Interim meeting

\* These drafts should have no/minor comments in order to move to next phase of the project.

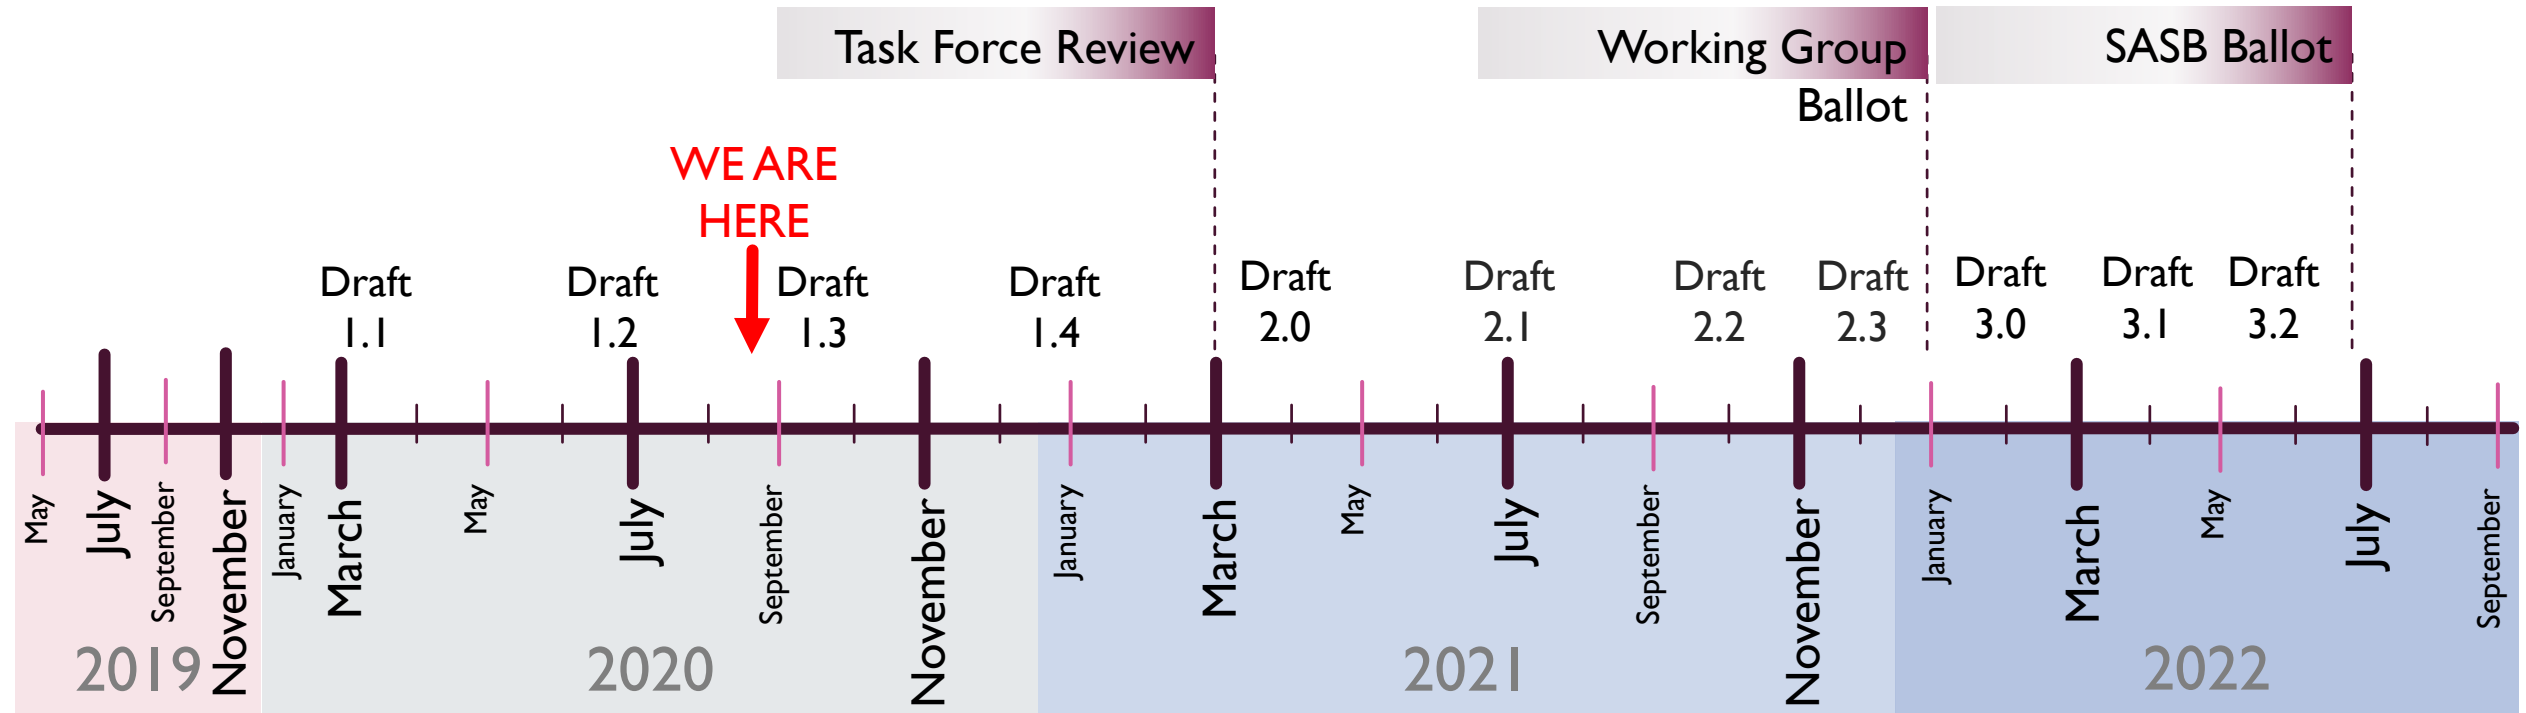

# TIMELINE ADJUSTMENT NEEDED

- Progress on the specification has been slower than forecasted, due to a variety of reasons.
  - For example, in the absence of in-person meetings, the Task Force now uses 4-5 weeks of telephonic meetings to resolve comments against a draft
- Three timeline proposals are presented for discussion and consideration:
  - Option #1: Expedited
  - Option #2: Moderate
  - Option #3: Extended
- In all three options, it is likely that IEEE P802.3ck will not intercept the IEEE P802.3dc Revision project (~early 2022)

# TASK FORCE STATUS – OPTION #1

# TASK FORCE STATUS – OPTION #2

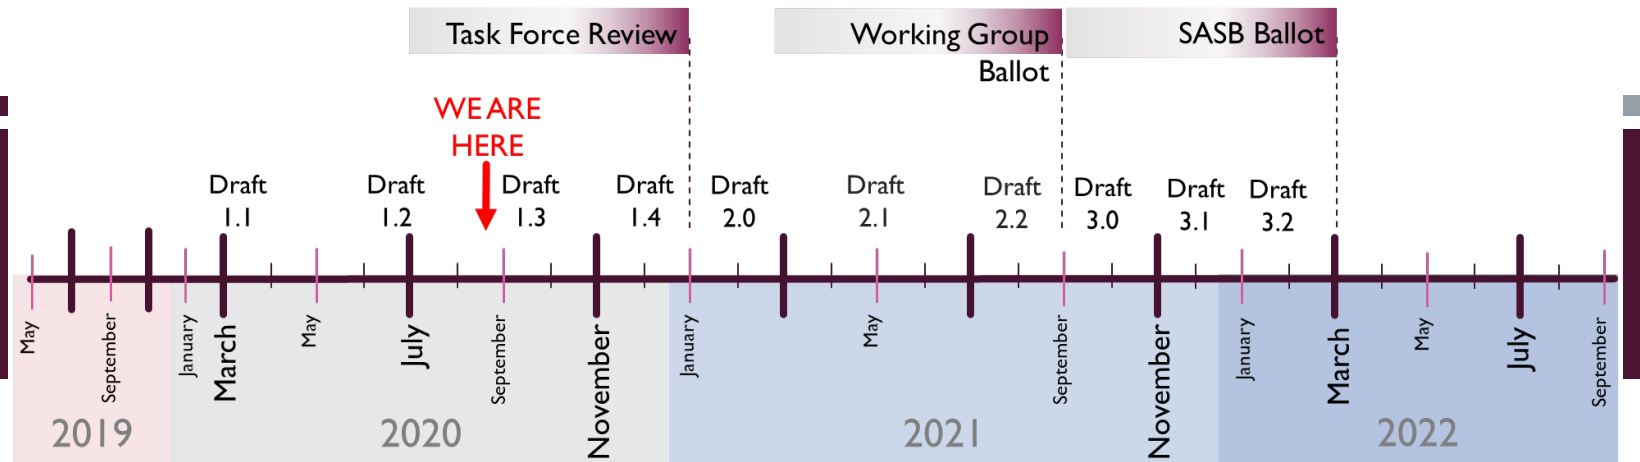

# TASK FORCE STATUS – OPTION #3
