

# D1.1 Comment Resolution Approach

Kent Lusted, Intel Corporation, IEEE P802.3dj Task Force Electrical  
Track Chair

Mark Nowell, Cisco, IEEE P802.3dj Vice Chair, Optics Track Chair

Gary Nicholl, Cisco, IEEE P802.3dj Logic Track Chair

# Progress Update

- We are in **Task Force** review. The entire document will be in scope for D1.2
  - Reminder: Scope opens again at the start of Working Group ballot and again at the start of IEEE SA ballot
- Our Goal right now: Get to Working Group ballot in a prudent, expedient manner
  - The document “[must be complete with no open technical issues](#)” (no TBDs)
- To resolve against D1.1, there are
  - ~152 electrical related comments
    - The CRG closed 1/3<sup>rd</sup> of electrical related TBDs during D1.0 comment resolution
  - Optics: ~112 optical related comments
  - Logic: ~52 logic comments
- Resolving *foundational TBDs* in this review cycle will let us see what issues remain and enable subsequent analysis/discussion to close them
  - May identify additional specification work items
- There was strong consensus in the Task Force for an “optimistic” schedule

# TF Leadership Intent

- Conclude all D1.1 comment resolution by the end of the IEEE 802.3 September interim meeting
  - Time is **very** limited
  - All comments may not be considered, as per the Task Force D1.1 review announcement

# Comment Resolution Approach

- Prioritization of comment closure (highest to lowest):
  - Close foundational & pivotal TBDs
    - Are there values or remedies that have sufficient consensus to use as a starting point? (Adopt now and refine in future drafts)
    - Unblock
  - Address known gaps and major errors in the specification with solutions
  - Changes to existing values
    - Strongly supported consensus presentations take priority
    - An acceptable justification for rejection is “The CRG cannot come to a consensus to make changes necessary to address the comment”
      - <https://standards.ieee.org/wp-content/uploads/import/governance/revcom/guidelines.pdf>

# Presentations Approach

- There were 40+ presentation requests for the September interim meeting
- TF leadership will be limiting presentation review to 5-7, maybe 10 minutes to maximize comment resolution time
  - A message was sent to the reflector encouraging all participants to review posted presentations beforehand
- All presenters were asked to focus their presentation time on the key aspects of their presentation
  - Including any updates, if any
- Q&A will be managed as appropriate for the topic and current progress of the comment resolution
- All presentations may not be heard

**Thanks!**
