

P802.3dj TF Electrical Track Big Ticket Items

Kent Lusted, Intel Corporation

IEEE P802.3dj Task Force Electrical Track Chair

Prelude

- Excellent progress made on electrical items during D1.0 comment resolution
- Identified values for many “TBDs”
 - Many of the values need to be confirmed through analysis
- Use the July Plenary to bring forward contributions on “big ticket items” for discussion and consensus building
 - Provides guidance to editorial team members on the direction to take for proposed responses on D1.1

Big Ticket Items

- CR/KR:
 - COM parameters (η_0 , d_w , N_{fix} , N_g , etc.), CA, TX values, SNDR, etc.
- MLSD: using for CR/KR or not? Implementation penalty proposal?
- ILdd C2M and C2C
- Jitter: J6u
- C2M Test1/Test2 losses and channel calibration

Thanks!
