

Meeting Minutes

Group: IEEE P802.3bn Channel Model Ad Hoc committee.

Event: Teleconference

Date: 17 Jan 2013 from 5:30 PM to 6:00 PM EST

Recorded by Duane Remein

Summary: The ad Hoc met briefly. The focus of discussion was on the definition of the “baseline channel conditions”.

Opening

The group reviewed the agenda.

The group reviewed IEEE Patent Policy and a Call for Patents was made, no responses were received.

Discussion

The group discussed what we thought would be appropriate to define as “baseline channel conditions”. This phrase is used in our objectives and it’s exact definition will impact how easy it will be to meet the objectives. If our definition is too stringent we may not be able to achieve the 1 Gbps in 120 MHz objective, given the amount of overhead (CP, PHY_Link, FEC, etc.).

The chair also briefly went over the items to be discussed in the Ad Hoc Report to the task force.

Action Items

No new action items were taken.

Item	Date	Assigned to	Status	Description	Response/Update
9	121018		O	Capture static model in Excel	Need an author if a this model is needed
10	121128	D Remein	O	Get channel model data template completed for Chinese MSOs	from EPoC SIG 11/19/12

Detailed presentation material:

All presentations will be available at [the p802.3bn private web site](#).

Attendees:

Name	Affiliation
Powell, Bill	Alcatel-Lucent
Farmer, Jim	Aurora Networks
Montreuil, Leo	Broadcom
Laubach, Mark	Broadcom
Remein, Duane	Huawei
