

**ISO/IEC JOINT TECHNICAL COMMITTEE 1**

**SUBCOMMITTEE No.25: INTERCONNECTION OF  
INFORMATION TECHNOLOGY EQUIPMENT  
WORKING GROUP 3: CUSTOMER PREMISES CABLING**

To: David Law, Chairman IEEE 802.3 [REDACTED]

CC: Adam Healey, Vice Chair IEEE 802.3, [REDACTED]  
Jon Lewis, Secretary, IEEE 802.3 Ethernet Working Group, [REDACTED]  
Alpesh Shah, Secretary, IEEE-SA Standards Board, [REDACTED]  
James Gilb, Chair, IEEE 802 LMSC, [REDACTED]  
James Withey, IEEE 802.3 Liaison Officer, [REDACTED]

**Subject: Liaison from ISO/IEC JTC 1/SC 25/WG 3**

Dear Mr Law,

Thank you for your liaison letter of 4 August 2024 and for sharing the latest draft of IEEE P802.3da with us.

We are happy to report, that during the recent meeting, 23 through 26 September, 2024, of ISO/IEC/JTC 1/SC 25/WG 3 in Yamagata, Japan, the “balanced single pair cabling” progressed.

The following documents passed the final voting process and have been published:

- 1 ISO/IEC TR 11801-9911: *Information technology - Generic cabling for customer premises - Part 9911: Guidelines for the use of balanced single pair applications within a balanced 4 pair cabling system*
- 2 ISO/IEC TS 29125 Amd2: *Amendment 2 - Information technology - Telecommunications cabling requirements for remote powering of terminal equipment*

The following documents are stable with respect to the technical content and we expect their submission to the final voting process after WG 3's March 2025 meeting.

- 3 ISO/IEC 11801-1 AMD1: *Amendment 1 - Information technology - Generic cabling for customer premises - Part 1: General requirements*
- 4 ISO/IEC 11801-6 AMD1: *Amendment 1 - Information technology - Generic cabling for customer premises - Part 6: Distributed building services*
- 5 ISO/IEC 30129 AMD2: *Amendment 2 - Information technology - Telecommunications bonding networks for buildings and other structures*

Thank you for your continued collaboration with ISO/IEC JTC 1/SC25 Working Group 3.

Sincerely,

Albrecht Oehler  
Convenor, ISO/IEC JTC 1/SC 25/WG 3
