TR-42 CORRESPONDENCE

Henry Franc, TIA TR42
Engineering Committee Chair,
[REDACTED]

Date: February 9, 2024

To: David Law, Chair, IEEE 802.3 Ethernet Working Group, [REDACTED]

Cc: Cindy Montstream, TIA TR-42 Engineering Committee Vice Chair,
[REDACTED]

Jonathan Jew, TIA TR-42 Engineering Committee Secretary, [REDACTED]
Teesha Jenkins, TIA Manager, Standards Secretariat Services, [REDACTED]
Bob Voss, Chair, ODVA EtherNet/IP Physical Layer SIG [REDACTED]
IEEE, care of Konstantinos Karachalios, Secretary, IEEE-SA Standards Board Secretary,
IEEE-SA Board of Governors [REDACTED]

Re: Outbound (from TR-42) Liaison to IEEE 802.3 and Review of TIA-TSB-6000

Dear Mr. Law:

Please accept this letter as confirmation that TR-42 has appointed Bob Voss as the outbound liaison from TR-42 to IEEE 802.3.

As his first action, as outbound Liaison, we ask that he bring you TIA-TSB-6000 to your group for review. The TSB is a summary of application data relative to the cabling channel requirements for those applications. We would kindly request that IEEE 802.3 review the table for accuracy on the applications your group develops. We have made our best efforts to ensure accuracy but would defer to you as the document authors. Ideally, we would appreciate a reply in advance of our next scheduled meeting in June of 2024; if this is not possible, we would appreciate an expectation level for the response.

Best Regards,

Henry Franc
Chair, TIA TR-42 Engineering Committee
