

PDCC Ad Hoc Report

10 March 2025

Chad Jones

Cisco Systems, Inc.

Ad Hoc Activity since November 2024 Plenary

- Held 5 meetings: 9 December 2024; 8 & 23 January; 5 & 12 February 2025
- Things discussed:
 - IEC TC 64 MT2
 - A new document, 60364-5-52 was reviewed. No guidance needed for the liaison.
 - IEC TC 64/PT 60364-7-716
 - Maintenance of IEC 60364-7-716:2023 ED1 started. This converted IEC TC 64/PT 60364-7-716 into IEC TC 64/MT 49. Our Category C liaison transferred to MT 49. The private area was updated accordingly. As a result, the PDCC charter will be amended as shown: “Build consensus on input to ~~IEC 60364-7-716~~, and proposed direction of, the IEEE 802.3 Category C liaison expert to IEC TC64/MT2 and IEC TC64/MT49; and”
- Minutes are posted in the ad hoc [public area](#)

Ad Hoc Activity since November 2024 Plenary, PT2

- Held 5 meetings: 9 December 2024; 8 & 23 January; 5 & 12 February 2025
- Things discussed:
 - Lot 7
 - Ad hoc discussed the removal of exemptions for midspans (active injectors) from the newest proposal. An electronic ballot was held for the WG to approve comments as the time from notification to comment due date was VERY short. Comments found here: https://www.ieee802.org/3/ad_hoc/PDCC/public/2024/IEEE_802d3_feedback_091224.pdf
 - IEC SC 25 WG 3
 - The delegation attended the 78th meeting from 24 Feb to 7 March, with the same guidance as provided when the effort started. WG 3 is moving forward with the 0.75 A channel, against the wishes of the IEEE 802.3 WG.

Plenary Meeting Activities

- Meeting scheduled for Monday 10 March PM1 in room 209 on level 2
 - If agenda exists, slides were due before this was confirmed. Will announce if it is cancelled in the WG open.

Thank You
