**Abstract:** This LS invites the ITU-T and ITU-R Study Groups and other standards organizations engaged in developing standards related to HNT to review and provide their updates on the new version of the Home Network Transport (HNT) Standards Overview and Work Plan.

ITU-T Study Group 15 entrusted WP1/15, under Question 1/15, with the task to manage and carry out the Lead Study Group on Home Network Transport (HNT) Standards activities. The outcome of the activities consists of the HNT Standards Overview and Work Plan which contains a list of the existing Standards and Recommendations from ITU and various other standardization bodies as well as information on the related Work Plan and ongoing HNT activities of these organizations.

This document is used to identify gaps and overlaps of standards activities pertaining to Home Network and so as to help in the coordination of HNT standardization activities. The document has been revised during the ITU-T SG15 meeting, 19-30 September 2022. The new updated version from the meeting can be found on: <http://www.itu.int/en/ITU-T/studygroups/Pages/sg15-hnt.aspx>

Q1/15 would like to express thanks for your kind cooperation, especially to those organizations that have

been previously contacted and made specific recommendations to update this document by LS. As usual after each revision, Q1/15 would again like to draw your attention to this document and would appreciate any suggestions and comments.

#### Home Network activities outside ITU-T SG15 WP1/15

Section 2 “Home Network activities within other ITU-T Study Groups”, Section 3 “Home Network activities in ITU-R Study Groups” and Section 4 “Home Network activities in other Standards Development Organizations” report on existing Home Network standardization activities (published Recommendations and Standards and those under study) in various standardization groups outside ITU-T SG15 WP1/15. Q1/15 invite you to review the status of the standardization activities related to Home Network Transport within your group or organization and to point out identified issues, gaps and overlaps regarding Home Network standardization.

Note also the web presentation of the HNT Standards Overview hosted on ITU-T SG15 website page “Documentation”: see at <https://www.itu.int/net4/ITU-T/landscape/#?topic=0.132&workgroup=1&searchValue=&page=1&sort=Revelance>

Section 7 “List of Contacts” contains a contacts list of standards organizations engaged in developing standards related to HNT. Q1/15 welcomes your comments and suggestions on this list, including any candidate standards organizations to add or you believe could be removed as not pertinent to the HNT Standardization and Work Plan.

Q1/15 of ITU-T SG15 looks forward to future liaisons with all pertinent ITU-T and ITU-R Study Groups, and other pertinent SDOs to keep the HNT Standards Overview and Work Plan current, relevant and effective.
